

Endress+Hauser and EMC

Your full range instrumentation partner in Water and Wastewater

EMC are delighted to be exhibiting at **enviroNZ05 - Water Matters**, the NZ Water and Wastes Association's Annual Conference and Expo being held at Auckland's Aotea Centre, 28 - 30 September.

This Newsletter highlights a selected variety of instrumentation available from EMC that is particularly suited to the water and wastewater industries.

Endress+Hauser product groups include flow, level, pressure, temperature, analysis and data acquisition and covers the instrumentation requirements for all WTP or WWTP measuring and control points.

Combine this with EMC's product, application and industry expertise and we are your ideal instrumentation partner.

Endress+Hauser - a full package

The challenge for a control and automation supplier, is to deliver products, solutions and services to customers wanting to manage increasing plant complexity in a cost saving context.

Worldwide, the environmental industry is driven by legislation that is pushing toward more efficient wastewater treatment. In order to meet the demands, it is necessary for plants to have ongoing treatment processes and control them by means of measurement and control systems.

Many plants monitor the inlet flow, the organic load, the reagent dosing in order to optimise the pollutant removal efficiency - tasks that can be performed by proper measuring devices.

Endress+Hauser and EMC can deliver the right product for each measuring task,

integrate it into the automation system and maintain it.

Measurement devices with fieldbus communications, can be integrated into control architecture in order to perform plant automation and remote control up to plant asset management solutions.

Total cost of ownership for each measurement task is an important consideration and E+H take this into account by having the right product segmentation for each measuring task. EMC can assist with the supply, commissioning, monitoring and maintenance in order to minimise costs.

A driving factor in wastewater treatment investment is cost reduction. The only way to maintain high standards while reducing

Expo Trade Visitors

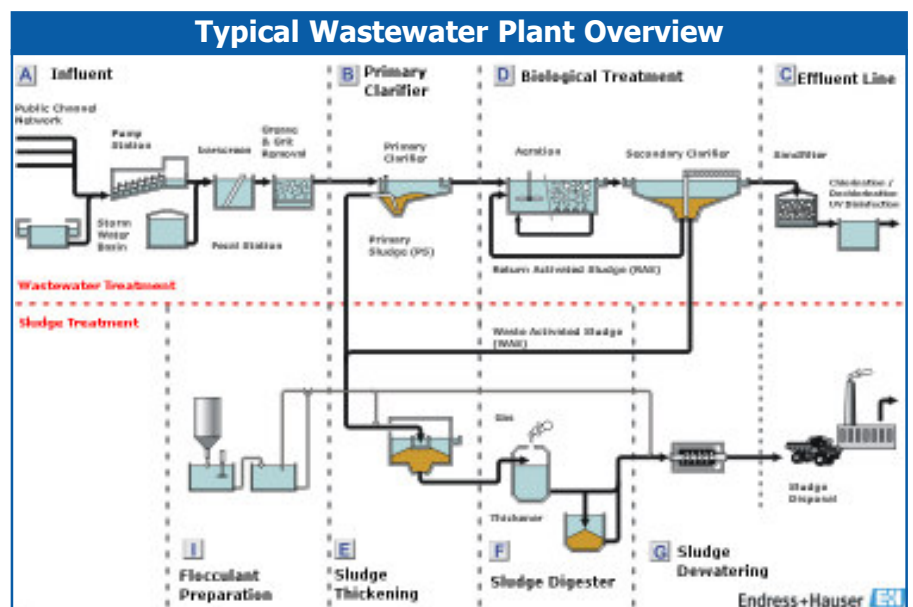

You are invited to visit the Trade Expo on Wednesday 28th or Thursday 29th between the hours of:

10.00am - 12.00pm and 2.00 - 5.00pm.

You will find EMC on Stand number 217 on Level 2.

Invited Guests are required to register at the registration desk where they will be issued with a visitors pass.

costs is to invest in sophisticated measurement and control technology, from a supplier offering the whole basket of instruments - EMC and Endress+Hauser.
